

Stay Clean Bilge Cleaner & Deodorizer

After 3-4 applications, the dreaded bilge cleaning chore becomes a breeze. The Marine Stay Byotrol Clean™ Bilge Cleaner/Deodorizer will reduce sludge and unpleasant odors. When winterizing, application of Stay Byotrol Clean™ will keep the bilge clean and odor free until the next boating season!

Stay Byotrol Clean's™ unique patented technology leaves an invisible barrier on surfaces leaving them cleaner longer. When applied according to instructions, Stay Byotrol Clean™ will clean stains caused by algae/mold/mildew while simultaneously deodorizing surfaces. And it will decrease future cleaning time after each subsequent application, making it an effective maintenance cleaner.

How to Use Stay Byotrol Clean™ Bilge Cleaner/Deodorizer:

If you have noticed a foul, musty smell on your boat, it likely means that the bilge needs cleaning. The first thing to do is to pump out the bilge to an appropriate pump-out facility. Then turn off the bilge pump to avoid pumping out the cleaning solution into a water source. Now spray or foam the entire bilge. Use a brush for hard to reach areas. Wait a few minutes for the Stay Byotrol Clean™ to do its work. Vacuum such liquid as there is. After 3-4 applications of Stay Byotrol Clean™, routine bilge cleaning will be a breeze!!

When winterizing, apply Stay Byotrol Clean™ and ensure entire bilge is completely saturated. Allow to air dry before storing and this will keep the bilge clean and odor free until the next boating season
